Product Description
Spa hand towels are a very suitable and comfortable towel in modern life, mainly used in hotels, beauty salons, spa centers, and homes. Its material is very soft and skin friendly, which can be well reflected in spa centers. The spa center consumes a lot of towels and has high requirements for customers' physical examinations. Compared to ordinary towels, our towels have better water absorption, stronger durability, and high-end properties, which can be well applied in various high-end places and daily life.
Firstly, the most important core of spa hand towels is the material. Our towels are usually made of 100% pure cotton or bamboo fiber, which can ensure good breathability and skin friendliness of the towels, without causing harm to the skin. Our towels adopt the most advanced textile technology plan, and the edges and corners are sealed with double needle edge technology, which will not cause the towels to pill or lose hair, while also making the towels softer.
Therefore, our towel sizes fully meet market demand and we can provide you with professional customization services. The typical size of a Spa hand towel is 30cm x 30cm or 33cm x 33cm. This size is specifically designed for experimental hand wrapping and wiping, making it more convenient to operate and controlling costs without wastage. It is mainly used for hand spa care, hand massage, beauty salons, and luxury hotels. In terms of color, we mainly use simple white, gray, etc., which can better reflect the peaceful atmosphere of the bath center and also match well with various environments.
