Product description

Our hotel towels robes are made from 100% high-quality combed cotton. The combing process removes short fibers and impurities, ensuring the fibers are longer and stronger. The finished product is fluffy and soft, with a delicate and smooth touch. It's highly absorbent and resists shedding even after repeated washings, providing customers with a dry, comfortable, and cloud-like experience.Different from ordinary products, we insist on high standard weight (commonly 550-650g/㎡) and high density weaving. The towel robe is thicker, fuller in suede, crisp and stylish, which not only improves the water absorption performance but also the warmth retention.The towel robes are double-needle stretch-stitched, making them sturdy, beautiful, and not prone to unraveling. Labels are either non-sense or imitation silk-screen printed to avoid rubbing against the guest's skin. The robes have sturdy belt buckles and wide ties for easy donning and doffing, while deep side pockets are convenient for storing small items such as mobile phones, all taking into account the actual hotel usage scenarios.Our towel robes can be customized with your hotel or spa's logo, making them truly unique. The beautifully embroidered logo creates a sense of luxury and exclusivity. Guests will be eager to wear them throughout their stay, and even after their vacation, they'll cherish the memory of bathing in the comfort of their own home.

Dyeing → Checking → Cutting → Filling

Quilting → Sewing → Packing → Warehouse

Compared with household towel robes

Characteristics Dimension	Hotel towel robe	Ordinary household bathrobes
Material	High-weigh cotton (terry/waffle/cut velvet)	Various materials, low weight, may be chemical fiber blended
Durability	Very high, designed for industrial washing	Generally, the frequency and intensity of washing are low
Hygiene standards	can withstand daily bleaching and disinfection	No such requirement
Design	Functionality (large pockets, wide belt), branding	Various styles, more emphasis on beauty and personality
Hand weight	Usually thicker and heavier	Usually thinner
Core Goals	Durable, uniform, hygienic, and improve customer experience	Comfortable, beautiful and personalized
